

## Table of Contents

Volume 17, Issue 4 — April 2023

---

### Research Articles

---

1.

#### **Biorational Assessment of Drugs and Their Metal Ion-Pairs on Flour Beetle *Tribolium confusum***

Mamdouh I. Nassar, Mohammed Zayed

*Keywords: bioactivity, phenylazo compounds, flour beetle, Tribolium confusum, metal complexes*

---

2.

#### **Job Satisfaction and Organizational Commitment of Sports Managers**

Mehmet Kargün, Mehmet Dalkılıç, Yavuz Selim Ağaoğlu

*Keywords: Job Satisfaction, Organizational Commitment, Sports Management, Affective Commitment, SPSS Analysis, Sports Administrators, Istanbul*

---

3.

#### **Intellectual Property and Economic Growth: A Review of Empirical Studies**

Mirësi Çela

*Keywords: Intellectual Property Rights, Economic Growth, Innovation, Empirical Studies, Public Policy*

---

4.

#### **Ichthyofaunal Diversity of Simli Dam, Islamabad, Pakistan**

Abdul Rab, Muhammad Farhan Khan, Muhammad Afzal, Najam ul Huda, Muhammad Ramzan Ali, Aziz Ahmad

*Keywords: fish biodiversity, Cyprinidae, Chandidae, conservation, Simli Dam, Mahasheer, ecological balance*

---

5.

### **Photodegradation of Benzene in Water with Palladium Catalysts Supported on Aluminum, Cerium, and Zirconium Oxides**

Gabriela Pérez Osorio, José Carlos Mendoza Hernández, Efraín Rubio Rosas, Gonzalo Iván Sánchez Tablas, Fernando Hernández Aldana

*Keywords: photocatalysis, benzene degradation, palladium catalysts, sol-gel method, UV radiation, solar collectors*

---

6.

### **Vegetation as Carbon Sequester and Their Role in Climate Change Mitigation**

Aparna Rathore, Y. T. Jasrai

*Keywords: carbon sequestration, climate change mitigation, vegetation, afforestation, reforestation, agroforestry, greenhouse gases*

---

7.

### **Novel Approach for Multi Period Portfolio Selection with Different Rates for Borrowing and Lending, Using Chance Constrained Programming**

Khadijeh Hassanlou, Masoud Rahi

*Keywords: Portfolio selection, Chance constrained programming, Genetic algorithm, Borrowing rates, Lending rates, Nonlinear programming, Investment strategy*
